This office action is responsive to communications filed 08/28/2006.

**Claims 1 – 5, 8, 9 and 11 – 13 are pending.**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11 – 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Glicksman (US 5,460,200).

Glicksman discloses a non-return device (20) comprising:

Flexible impervious wall members (22,24) of complementary shapes disposed face-to-face in surface contact in a tubular housing (16); and

Means holding said walls spaced apart (near (34)) at end of the device wherein the thickness of the wall members is in the range of 1% to 2% of their width. (Col. 4, lines 20 – 26).

Recitations pertaining to 'waste outlet' and "waste pipe" are regarded in this office action to be reflective of intended use and it is noted that the device of Glicksman as set forth above is capable of such use. The recitation of "waste" in line 14 of claim 11 is regarded as a mere identifier.

3. Claims 1 – 5, 8 and 9 are allowed.

***Response to Arguments***

Applicant's arguments filed 08/28/06 have been fully considered but they are not persuasive. Applicant's argument that the Glicksman reference lacks a means for

Art Unit: 3753

holding the wall members apart is not persuasive since the material of the wall members serves as the means that retains the wall members apart and is assisted in that by the heat-sealing of the two edges of the wall members in the longitudinal direction. Recitations pertaining to 'waste outlet' and "waste pipe" are regarded in this office action to be reflective of intended use and it is noted that the device of Glicksman as set forth above is capable of such use. See Col. 4, lines 35 – 36, wherein the use of the device with water is disclosed. The recitation of "waste" in line 14 of claim 11 is regarded as a mere identifier. Applicant's argument that "discontinuities" in the wall members in Glicksman would present a site for collection of stagnant water etc. is unpersuasive in that it concerns limitations not expressly recited in the claims. While Glicksman's device may have reasons different from those of the instant invention in choosing the dimensions recited, the fact is that Glicksman's device does recite the dimensions recited.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

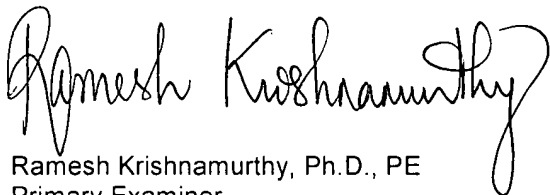

Art Unit: 3753

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
